

Look at what we've
been learning
Summer 1 EYFS 2025
Come Outside!

Communication and language

Our words of the week have continued to help us learn new vocabulary, use them in our writing and retell amazing stories!

We particularly liked ... metamorphosis when learning about our caterpillars!

Physical Development

Make sensible choices.

And look after ourselves and others.

We have been encouraged to use our independence this term.

Personal, Social and Emotional Development

We have been finding out how to care for other things. Our caterpillars have been munching on their food, our sunflowers have grown and we have been watching our beans sprout roots too!

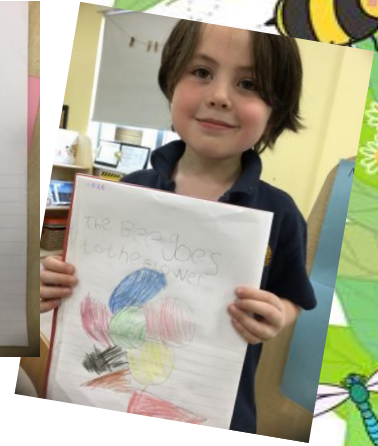

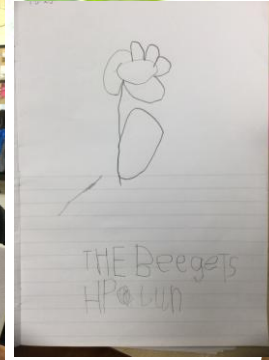

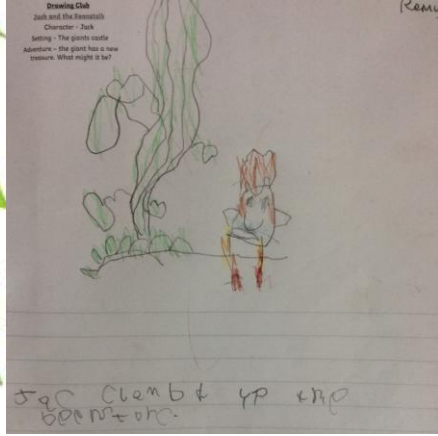

Our school value this half term was trust.

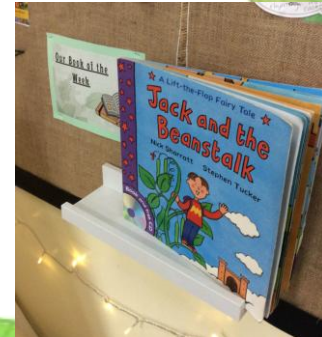

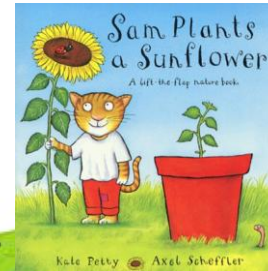

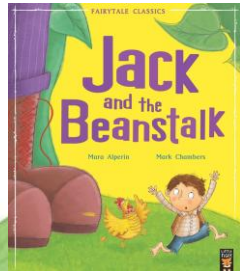

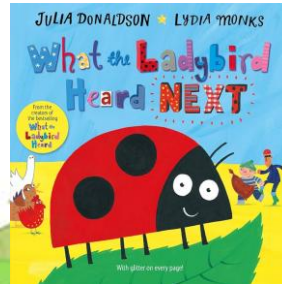

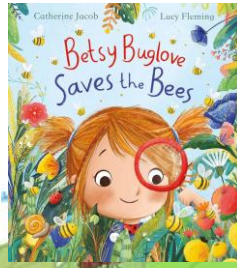

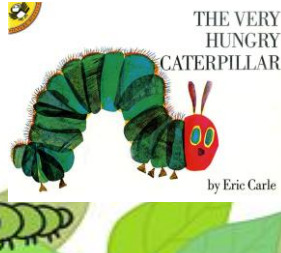

Literacy

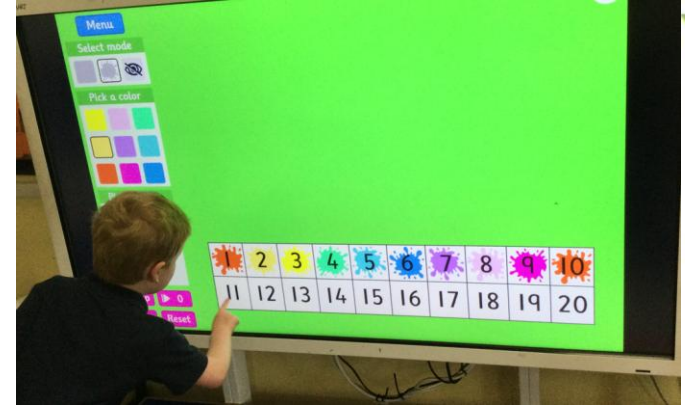

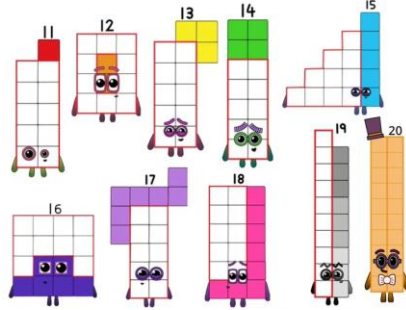

Drawing Club has been brilliant this term. We have used the books below to really develop our drawing skills and we are getting really confident with our sentence writing.

We use Drawing Club for our Literacy in the Spring and Summer terms.

Maths

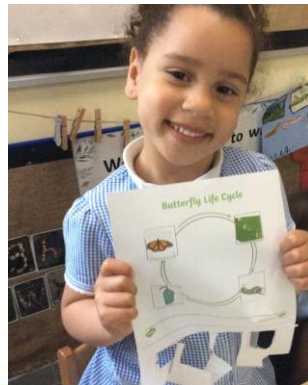

In maths this half term we have been learning about numbers beyond 10. We have been adding more and taking away.

Understanding the World

We have been learning about things outside in our garden this term. We've looked at all sorts of minibeasts, grown sunflowers and beanstalks and planted vegetables.

Expressive Arts and Design

Drawing skills

Using pastels

Observational drawing

Provision areas

Provision areas

We have continued to develop our provision areas both inside and out. Helping us to use those independent skills, investigate and develop our physical skills too!
